Functions and performance levels:

**basic requirements for safety footwear** (see Table 2 and 3 of EN ISO 20345:2011): all mandatory ones, among which:

**SRC= Slip resistance** - meets the following requirement:

- surface: ceramic / lubricant: detergent solution;
- surface: steel / lubricant: glycerol.

**Additional requirements** (Tab. 18 and 20 of EN ISO 20345:2011):

**S1:** closed seat region, antistatic properties, energy absorption of seat region, resistance to fuel oil, **P:** penetration resistance; **HRO:** resistance to hot contact of the outsole; **HI:** heat insulation of sole complex.

**Note:** the penetration resistance of the synthetic stitch proof insole tends to decrease with the diameter of the perforating object; in return the synthetic insole offers more protective surface and ergonomics advantages (flexibility, insulation, humidity and impact absorption).

Marking:

on a stitched label and containing the following information:

(see example below)

- **CE Marking** attesting PPE conformity to all the provisions of Directive 89/686/EEC (and any subsequent amendments);
- Name of the Manufacturer (printed on the lateral side of the footwear);
- designation of the footwear (alphanumeric code: unique/unambiguous);
- nr. and year of the Technical Harmonized Standard of reference;
- safety symbols;
- size of footwear;
- date of production (month + year);
- additional information: internal codes.

**Note:** the Technical File contains a more detailed description of the PPE (material, method of assembly, photographs or drawings), performance data, safety functions and level of protection, elements of conformity to the basic and supplementary requirements.

The Technical File is integral part of the present Certification, which has to be kept available by the applicant to be forwarded - upon request - to the entitled person (supervising body, Controlling Officer).
