Functions and performance levels:

basic requirements for safety footwear (see Table 2 and 3 of EN ISO 20345:2011): all mandatory ones, among which:

SRC= Slip resistance - meets the following requirement:

- surface: ceramic / lubricant: detergent solution;
- surface: steel / lubricant: glycerol.

Additional requirements (Tab. 18 and 20 of EN ISO 20345:2011):

S3: closed seat region, antistatic properties, energy absorption of seat region, resistance to fuel oil, water penetration resistance and absorption (water-repellent upper), penetration resistance, cleated outsole; **HRO:** resistance to hot contact of the outsole; **HI:** heat insulation of sole complex.

Note 1: the penetration resistance of the synthetic stitch proof insole tends to decrease with the diameter of the perforating object; in return the synthetic insole offers more protective surface and ergonomics advantages (flexibility, insulation, humidity and impact absorption).

Note 2: the footwear also meets the requirement in accordance with EN ISO 61340-4-3:2001 for the electrical resistance **ESD class 1** (electric dissipative footwear).

Marking:

on a stitched label and containing the following information:

(see example below)

- **CE Marking** attesting PPE conformity to all the provisions of Directive 89/686/EEC (and any subsequent amendments);
- Name of the Manufacturer (printed on the lateral side of the footwear);
- designation of the footwear (alphanumeric code: unique/unambiguous);
- nr. and year of the Technical Harmonized Standard of reference;
- safety symbols;
- size of the footwear;
- date of production (month + year);
- additional information: internal codes.
